21	Troubleshooting Quick Reference	23

■ 1. Getting Started — Login Page

Open your web browser and navigate to **http://localhost:5012**. You will see the JCF login screen with the app logo, username and password fields, and the orange **Sign In →** button.

Fig 1.1 — Login page showing hero panel (left) and login card (right)

Step-by-Step Login:

- ① Click the **USERNAME** field and type: **admin**
- ② Click the **PASSWORD** field and type: **admin@123**
- ③ Click the orange **Sign In →** button
- You will be redirected to the Main Dashboard automatically.

■ The eye icon ■ next to the password field toggles password visibility.

■ Default credentials are **admin / admin@123**. Change the password after first login via **Settings → Users**.

2. Main Dashboard Overview

After logging in you see the full dashboard. It is divided into four zones: the **top header bar** (status + controls), the **navigation tab bar** (section switcher), the **stats cards** row, and the **main content area**.

Fig 2.1 — Main Dashboard with all four zones visible

Zone	Location	What it contains
① Header Bar	Top strip	DB status, NET status, MSSQL badge, Fetch button, Bell, Chat, Help, Admin
② Nav Tabs	Below header	All section tabs: Alerts, Latest Articles, Today News, Topics, Categories...
③ Stats Cards	Row of counters	Total Articles, Today, Alerts, High Priority, Medium, Favourites, AI Verified
④ Content Area	Main body	Changes per selected tab — news table, alerts, map, settings, etc.

Fig 2.2 — Header bar close-up showing DB, NET, MSSQL, Fetch, Bell, Chat, Excel and Admin controls

■ 3. Navigation Bar — All Sections

The navigation bar runs horizontally below the header. Click any tab to switch to that section instantly. The active tab is underlined in orange.

Fig 3.1 — Navigation tab bar. Active tab is highlighted with orange underline.

#	Tab Name	What it shows
1	■ Alerts	Manual alerts created by admin/reporters
2	■ Latest Articles	All fetched RSS articles, newest first
3	■ Today News	Articles published today only
4	■ Top 20 Topics	Most frequent keywords/topics across all feeds
5	■■ Categories	Articles grouped by category (Traffic, Weather...)
6	■ Favourites	Articles/alerts you have starred
7	■■ Map	Interactive map with geo-pinned news events
8	■ Read Latest	Mark latest articles as read — track progress
9	■ Read Today	Mark today's articles as read
10	■ Read Top-20	Mark Top 20 topic articles as read
11	■ Pivot	Pivot/analytics view — counts by category, source
12	■■ Settings	System config, RSS feeds, users, intervals
13	■ User Mgmt	Add/edit/remove users (Admin only)

■ 4. Alerts Section

The Alerts section is for time-critical events manually created by admin or reporter users. Each alert has a **priority** (High/Medium/Low), category, and optional urgent flag.

Fig 4.1 — Alerts tab showing stats cards, topic management, search bar, filter row and export buttons

Key Areas:

- **Stats Cards** — Show live counts: Total Articles, Today, Alerts, High Priority, Medium, Favourites, AI Verified
- **Topic Management** — Upload a .txt file of topics OR add manually and click + Add
- **Search Bar** — Type keywords to filter the article table in real-time
- **Filter Row** — Dropdown filters for Priority, Category, Sentiment, Source, AI Status, Topics, Date range
- **Export Row** — CSV, PDF, Selected CSV, Selected PDF, Mark All Read buttons
- **Articles Table** — Sortable table with: #, Priority, Category, Source, Title/Link, City, Time, Sentiment, Topics, AI, Remark, Actions

■ 5. Latest Articles (News Feed)

The **Latest Articles** tab shows all RSS-fetched articles sorted by newest first. Each row in the table is one article with priority badge, source, title link, city, time (IST), sentiment, topics, AI verification status, and action buttons.

Fig 5.1 — Latest Articles tab showing filter row, export buttons and article table columns

Article Table Columns:

Column	Description
#	Row number
PRI	Priority badge — ■ High / ■ Medium / ■ Low (click to change)
CAT	Category icon — Traffic, Weather, Crime, Health, etc.
SOURCE	RSS feed source name
TITLE & LINK	Article headline — click to open full article in new tab
CITY	Auto-detected city/region from article content
TIME (IST)	Publication time in Indian Standard Time
SENTIMENT	Auto-detected sentiment — Positive / Negative / Neutral
TOPICS	Matched topics from your topic list
AI	AI verification status (requires Groq API key)
REMARK	Add internal notes/remarks to any article
ACTIONS	■ Favourite ■ Share ■ Assign ■ Delete

6. Today News

The **Today News** tab filters the article table to show only articles published on today's date. Identical layout to Latest Articles but scoped to today only.

Fig 6.1 — Today News tab — orange underline shows active tab. Same layout as Latest Articles, filtered to today's date.

■ 7. Top 20 Topics

The **Top 20 Topics** tab shows the 20 most frequently mentioned keywords across all fetched articles. This helps you quickly spot trending events.

Fig 7.1 — Top 20 Topics tab. Topics ranked by frequency across all RSS feeds with sentiment and count filters.

8. Categories

The **Categories** tab groups all articles by their content category. Categories include: Weather & Disaster, Transport & Traffic, Law & Security, Government & Politics, Events & Gatherings, Utilities & Infrastructure, Health & Epidemic, Supply Chain & Essential Services, Digital & Platform Services, Delivery & Quick Commerce, Business & Economy, and Other.

1 Category Filter Buttons

2 Search + Priority + Source + Date + Transport & Traffic + Law & Security + Government & Politics + Events & Gatherings + Utilities & Infrastructure + Health & Epidemic + Supply Chain & Essential Services + Digital & Platform Services + Delivery & Quick Commerce + Business & Economy + Other

3 Filtered Articles Table

#	PRI	CAT	SOURCE	TITLE & LINK	CITY	TIME (IST)	SENTIMENT	TOPICS	AI	REMARK	ACTIONS
---	-----	-----	--------	--------------	------	------------	-----------	--------	----	--------	---------

User Management

Create New User

USERNAME *
e.g. john_doe

FULL NAME
John Doe

ROLE

Fig 8.1 — Categories tab showing category filter buttons and filtered article table.

■ 9. Favourites

Star any article or alert to add it to **Favourites**. Favourites are saved per-user and accessible from this tab anytime.

Fig 9.1 — Favourites tab. Click the ■ icon in the Actions column on any article to bookmark it.

How to Favourite an Article:

- Go to Latest Articles (or any news tab)
- In the **ACTIONS** column, click the ■ icon on any row
- The star turns yellow — article is saved to Favourites
- Click **Favourites** tab to see all bookmarked items
- Click ■ again to remove from Favourites

10. Map View

The **Map** tab shows an interactive Leaflet map of India with coloured pins for news events and alerts. Each pin is coloured by category so you can instantly see the geographic spread of events.

Fig 10.1 — Map tab. Pins appear for articles with detected city/state data. Click any pin to see a summary popup.

Using the Map:

- Click **Map** in the navigation bar
- The map initialises showing India — pins appear for articles with detected locations
- Click any pin to see a popup with article count, top category, and a "View Location Full Articles" button
- Use scroll wheel or +/- controls to zoom in/out
- Drag the map to pan to different regions

■ 11. Read Latest / Read Today / Read Top-20

These three tabs let you **mark articles as read** to track your reading progress. Useful for teams where each member tracks what they have reviewed.

Fig 11.1 — Read Latest tab showing article list with read-tracking checkboxes.

- ■ **Read Latest** — Check off articles from the Latest Articles feed
- ■ **Read Today** — Check off today's articles
- ■ **Read Top-20** — Check off top trending topic articles
- The **Mark All Read** button in each tab clears all unread badges at once

12. Pivot / Analytics

The **Pivot** tab provides an analytics summary — article counts grouped by category, source, sentiment, and date. Useful for reports and trend analysis.

The screenshot displays the Pivot/Analytics tab of the JCF RSS Alert & News Dashboard. The top navigation bar includes tabs for Alerts, Latest Articles, Today News, Top 20 Topics, Categories, Favourites, Map, Read Latest, Read Today, Read Today, Pivot (highlighted with a yellow box and a '1' icon), Settings, and User Management. The main content area features an 'Analytics summary — counts by category, source, sentiment, date' section with a '2' icon. Below this is an 'Admin — Topic Management' section with a 'Browse' button and a 'Reprocess' button. The 'Export CSV' and 'Export Excel (all pivots)' buttons are highlighted with a yellow box. The 'All Articles — Read / Unread Overview' section shows a table with columns for TOTAL, READ, UNREAD, and TODAY TOTAL. The 'All — by Source' section shows a table with columns for SOURCE, TOTAL, POSITIVE, NEGATIVE, and NEUTRAL. The 'Today — by Source' section shows a table with columns for SOURCE, TOTAL, POSITIVE, NEGATIVE, and NEUTRAL. The 'By Category (Today)' section shows a table with columns for CATEGORY, TOTAL, HIGH, MEDIUM, and LOW. The 'By Topic — All Articles' section shows a table with columns for #, TOPIC, TOTAL, READ, UNREAD, and POSITIVE. The 'By Topic — Today' section shows a table with columns for #, TOPIC, TOTAL, READ, UNREAD, and POSITIVE. The 'User Management' section shows a table with columns for #, USERNAME, FULL NAME, ROLE, STATUS, LAST LOGIN, and ACTIONS. A 'Create New User' button is also present.

Fig 12.1 — Pivot/Analytics tab. Export the full pivot data to Excel with one click.

■ 13. Search & Filters

Every news tab has a **search bar** and a row of **filter dropdowns** that let you narrow the article table by any combination of criteria.

Fig 13.1 — Search bar and filter row. Eight controls: keyword search, clear, and six dropdown filters.

How to Search:

- ① Click the **search box** — type any keyword (e.g. 'Bangalore power cut')
- ② The table filters instantly as you type
- ③–⑧ Use the **dropdowns** to further narrow by Priority, Category, Sentiment, Source, or Date
- Click **X Clear** to reset all filters

Filter	Options
All Priority	All / High / Medium / Low
All Categories	All / Traffic / Weather / Crime / Health / Power / Festival / Business / Politics
All Sentiment	All / Positive / Negative / Neutral
All Sources	Dropdown list of all active RSS feeds
All AI Status	All / Verified / Unverified / Failed
All Status	All / Read / Unread
All Topics	Any manually added topic keywords
Date Range	From date and To date pickers

■ 14. Export — CSV, PDF, Excel

The export buttons appear above the article table on every news tab. Exports respect your **active filters** — only the currently visible articles are exported.

Fig 14.1 — Export buttons row showing CSV, PDF, Selected CSV, Selected PDF and Mark All Read.

Button	Action	Notes
■ CSV	Export all filtered articles as .csv	Opens download — open in Excel/Sheets
■ PDF	Export all filtered articles as .pdf	Formatted PDF with headers
■ Selected CSV	Export only checked rows as .csv	Tick checkboxes in # column first
■ Selected PDF	Export only checked rows as .pdf	Tick checkboxes in # column first
✓ Mark All Read	Mark all visible articles as read	Updates read status for your user
■ Excel	Export all articles to Excel (.xlsx)	Available from the top header bar

■ 15. Share — WhatsApp, Email, Telegram

Click the ■ share icon in any article's **Actions** column to open the Share modal. From there you can send the article via WhatsApp, Telegram, Email, internal chat, or copy the link.

Fig 15.1 — Share modal with WhatsApp, Arattai, Telegram, Email, Send to User, More Apps, Copy Link and Copy Summary options.

Option	What it does
■ WhatsApp	Opens wa.me with article title + link pre-filled
■■ Arattai	Shares via Arattai (Indian social platform)
📠 ■ Telegram	Opens Telegram with article link
■ Email	Opens your mail client with subject + article link
■ Send to User	Sends via internal JCF Chat to a colleague
■ More Apps	Device native share sheet — any app on your device
■ Copy Link	Copies article URL to clipboard
■ Copy Summary	Copies title + summary as formatted text

■ 16. Notifications Bell

The bell icon ■ in the top-right header opens a notification dropdown. A badge number shows unread notification count.

Fig 16.1 — Notifications panel opened from ■ bell button (top-right). Shows unread count and Mark all read button.

- Click the ■ **bell button** in the top header to open/close the panel
- The orange badge number on the bell shows unread count
- Click **Mark all read** to clear all unread notifications at once
- Notifications include: new alerts, chat messages, RSS fetch results, system events
- Click any notification to navigate to the related article or alert

17. Settings & Configuration

The **Settings** tab (admin only) controls system-wide configuration: fetch interval, data retention, logo, RSS feeds, and more.

Fig 17.1 — Settings tab showing Groq API key, fetch interval, data retention, theme and other configuration options.

Top Header Controls (always visible):

Control	Description
DB SQLite	Database status — green dot = connected. Shows SQLite (local) or MSSQL
NET OFF/ON	Network/internet connectivity status indicator
MSSQL	Click to see MSSQL connection details and fallback status
Interval Picker	Set auto-fetch frequency: 5/10/15/30/60 minutes
Fetch	Click to manually trigger an immediate RSS fetch
Excel	Export all articles directly to Excel (.xlsx)
Chat	Open internal team chat panel

■ 18. RSS Feed Manager

The **RSS Feed Manager** (inside Settings) lets you add or remove custom RSS feeds without editing any code. Changes take effect at the next fetch cycle.

Fig 18.1 — RSS Feed Manager section in Settings. Add new feeds by name and URL.

How to Add a Custom RSS Feed:

- Step 1: Click **Settings** in the navigation bar
- Step 2: Scroll down to the **RSS Feed Manager** section
- Step 3: In the **Feed Name** field, type a short name (e.g. 'My Custom Feed')
- Step 4: In the **RSS URL** field, paste the full feed URL (must end in .xml, .rss, or /feed)
- Step 5: Click the **Add Feed** button — it appears in the feed list immediately
- Step 6: The feed will be fetched on the next auto-fetch cycle

■ Only valid RSS/Atom XML feeds are supported. If a URL returns errors it shows as 'Connection Error' in the status. Test the URL in your browser first.

■ 19. User Management (Admin Only)

The **User Mgmt** tab lets the Admin create, edit, and deactivate user accounts. Each user has a role controlling what they can access. Maximum 20 users.

Fig 19.1 — User Management tab. User table on the left, Create User form on the right.

Role	Permissions
Admin	Full access — manage users, settings, all features
Reporter	Create alerts, share, export — cannot manage users or settings
Analyst	Read, search, export, favourites — read-only, no create/delete
Viewer	Read-only access to news feed only

How to Create a New User:

- Step 1: Click **User Mgmt** tab in navigation
- Step 2: Click **+ Create New User** button on the right side
- Step 3: Fill in: Username, Full Name, Role, Password
- Step 4: Click **Create User** — user can log in immediately

■ 20. Mobile View

The JCF Dashboard is **fully responsive** and works on mobile phones and tablets. The login page and dashboard adapt their layout for small screens automatically.

Fig 20.1 — Left: Mobile login screen. Right: Mobile dashboard after login.

- The login page shows the JCF logo, app name, username/password fields, and Sign In button
- After login, the full navigation and content is accessible on mobile
- The layout stacks vertically on small screens
- All features work on mobile including search, export, share, and map
- Access the dashboard from any device on the same network using the server's LAN IP

■ 21. Troubleshooting Quick Reference

Common issues and how to fix them:

Problem	Cause	Fix
Can't open localhost:5012	App not running	Run: python app_jcf.py
Login fails	Wrong credentials	Use admin / admin@123
'DB SQLite' in header	No MSSQL — using fallback	Normal — all features work in SQLite mode
'NET OFF' shown	No internet for RSS fetch	Check network; RSS won't fetch offline
No articles showing	RSS blocked or no internet	Click ■ Fetch; check NET status
PDF export fails	fpdf2 not installed	pip install fpdf2
Excel export fails	openpyxl not installed	pip install openpyxl
Map shows no pins	No geo-tagged articles	Articles need city/location data in feed
DB Error: near IF syntax	MSSQL syntax on SQLite	Safe warning — app continues normally
Notifications not updating	Browser cache	Hard refresh: Ctrl+Shift+R

Installation Commands:

```
pip install flask requests openpyxl fpdf2 pillow
pip install newspaper3k nltk
pip install netifaces # For LAN QR code
pip install pyodbc # For MSSQL only
```
